150W LED Spot Moving Head Light

USER MANUAL

KEEP THIS MANUAL FOR FUTURE NEED

Thank you for your patronage. We are confident that our excellent products and service can satisfy you. For your own safety, please read this user manual carefully before installing the device.

In order to install, operate, and maintain the lighting safety correctly. We suggest that the installation and operation should be done by the verified technician and follow the instruction strictly.

CAUTION! Keep this device away from rain and moisture!

CAUTION! Unplug mains lead before opening the housing.

Every person involved with the installation, operation and maintenance of this device has to:

- -be qualified
- -follow carefully the instructions of this manual

1. INTRODUCTION

Thank you for having chosen this professional moving head.

You will see you have acquired a powerful and versatile device.

Unpack the device. Inside the carton box you should find:

- One XLR power cable
- One user manual.
- 3. Two pcs omega

Please check carefully that there is no damage caused by transportation.

Should there be any, please consult your dealer and don't install this device.

2 Mounting and installation

2.1 Cautions: for added protection mount the fixtures in areas outside walking paths ,seating areas,or in areas were the fixture might be reached by unauthorized personnel.

Before mounting the fixture to any surface, make sure that the installation area can hold a minimum point load of 10 times the device's weight.

Fixture installation must always be secured with a secondary safety attachment, such as an appropriate safety cable.

Never stand directly below the device when mounting ,removing ,or servicing the fixture, from a ceiling,or set on a flat level surface (see illustration below). Be sure this fixture is kept at least 0.5m (1.5ft) away from any flammable (decoration etc.)

Always use and install the supplied safety cable as a safe cable as safety measure to prevent accidental damage and /or injury in the event the clamp fails.

2.2 Mounting points:

Overhead mounting requires extensive experience, including others calculating working load limits, a fine knowledge of the installation

material being used ,and periodic safety inspection of all installation material and the fixture. If you lack these qualifications ,

Do not attempt the installation yourself ,improper installation can result in bodily injury.

Be sure to complete all rigging and installation procedures before connecting the main power cord to the appropriate wall outlet.

2.3 Clamp mounting:

The LED moving head provides a unique mounting bracket assembly that integrates the bottom of the base, the included 'omega bracket' and the safety cable rigging point in one unit (see the illustration below). When mounting this fixture to truss be sure to serve to secure an rated clamp to the included omega bracket using a M10 screw fitted through the center hole of the 'omega bracket'. As an added safety measure be sure to attached at least one properly rated safety cable to the fixture using on of the safety cable rigging point integrated in the base assembly.

2.4 DMX-512 control connection

Connect the provided XLR cable to the female 3-pin XLR output of your controller and the other side to the male 3-pin XLR input of the moving head. You can chain multiple Moving head together through serial linking. The cable needed should be two core, screened cable with XLR input and output connectors. Please refer to the diagram below.

2.5 DMX-512 connection with DMX terminator

For installations where the DMX cable has to run a long distance or is in an electrically noisy environment, such as in a discotheque, it is recommended to use a DMX terminator. This helps in preventing corruption of the digital control signal by electrical noise. The DMX terminator is simply an XLR plug with a 120 resistor connected between pins 2 and 3, which is then plugged into the output XLR socket of the last fixture in the chain. Please see illustrations below.

3 TECHNICAL PARAMETERS

Input voltage: AC100-240V 50/60Hz

Power Consumption: 180W

Power connection: blue and white power con

Signal connection: 3pin-XLR male / female

Light source: 150W high power white led

DMX channels: 18/13/11 channels

Color wheel: 7 colors + open

Static gobo wheel: 8 gobo+ open

Rotating gobo wheel: 6 gobo+ open

Effect Wheel: two Effect prism, one Rotation six prism, one Rotation five

prism effect move , Bi-directional rotation

Beam Zoom angle 9° -14°

Focus: Electronic focus

Movement:Pan/Tilt X axis: 540°, Y axis 190°

Control mode: DMX512 / Master-slave/ Auto run / Sound

Display: OLED display

IP rate: IP20

Package size:485X355X280mm

Net weight: 8.5KGS

Gross weight: 10KGS

5:Function Mode

5.1 DMX address setting

With this function, you can adjust the desired DMX-address via the

Control Board.

Select via the encoder.

Press the encoder, adjust the DMX address by turning the encoder.

Press the encoder to confirm.

Press the Mode/Esc-button in order return to the main menu.

Set DMX address

Display the DMX 512 value of each channel

With this function you can display the DMX 512 value of each channel.

The display automatically

shows the channel with a value changing.

5.2 Run Mode

The LED moving head have 6CH and 17CH, can receive the International DMX signal.

In the 【Run】 mode, you can chose 【Master】 mode [Sound Control]

[Master Auto Run] [Master Sound Control] and 【Slave】 mode.

5.3 Language Setting

With this function, you can choose the Language between English and Chinese.

5.4 Advanced Set up

Pan Reverse

With this function you can reverse the Pan-movement.

Tilt Reverse

With this function you can reverse the Tilt 1-movement.

Display Reverse

With this function you can reverse the Tilt 2-movement.

Reset

With this function, you can reset the device via the Control Board. You can select the different reset function by turning the encoder.

Factory Reset

With this function, you can select restore factory set for ON or OFF, the default is OFF.

5.5System State

With this function, you can know the On Time ,Accumulative Time,

Current Run Mode ,Temperature and Software Version.

5.6 Manual Control

With this function ,you can adjust the pan and tilt and the move speed, also adjust the dimmer ,strobe and color.
